Specifications

Design	Sashay with PreFixx®
Application	Indoor/outdoor, contract, hospitality, healthcare, dental, motorhome & marine
Usage	Waterproof upholstery and bedhead
Width	137cm approx.
Pattern Repeat	n/a
Composition	100% vinyl face, polyester knit terry loop backing
Abrasion	1.3 million Wyzenbeek
Flammability	AS/NZS 1530 pt 3
Lightfastness	650 Hours UV
Finishes	PreFixx protective finish - antimicrobial, stain resistance and easy cleaning
Distinction	Sashay is designed to resist damage from disinfectants, prolonging life of the fabric.
Colours Available	12

Maintenance

Cleaning Directions

Regular Cleaning

Remove ordinary dirt and smudges with a mild soap and water solution and a clean, soft cloth or towel. Dry with a soft, lint-free cloth or towel.

Disinfection

PreFixx protected upholstery can be disinfected with a variety of hospital grade disinfectants without discolouring or damaging the finish. Disinfection does not replace the need for regular care and maintenance.

A diluted household bleach (sodium hypochlorite) solution (1:5 bleach to water ratio). Rinse thoroughly with fresh water. Dry with a clean towel.

Cleaning Guide

Although vinyl upholstery treated with PreFixx protective finish is resistant to most common stains, the dyes and pigments in some staining agents have the ability to create a permanent stain if not treated properly. To clean difficult stains from upholstery treated with PreFixx protective finish, locate the type of stain in the lists below and follow its recommended cleaning method. For best results, treat all stains immediately.

Cleaning Tip: To determine the method and type of cleaners, the source of the stain should be identified.

Stain Type: Baby oil, ketchup, chocolate, motor oil, olive oil, grape juice, urine, blood, hair oil tonic, tea, coffee and betadine. **Use Step 1.**

Stain Type: Eye shadow, crayon, grease, tobacco tar (nicotine), permanent felt tip marker, yellow mustard, lipstick, ballpoint pen and spray paint. **Use Step 1. If stains remain, use Step 2.**

Cleaning Methods 1 & 2 are progressively more aggressive. Often, it is better to begin with the least aggressive cleaner and to move to the next strongest only if the stain remains. NEVER EXCEED recommended cleaner or cleaning method.

Step 1: Use a non-abrasive cleaner with a soft cloth or damp sponge. Rinse area with fresh water then dry with a clean, lint-free cloth.

Step 2: Use a solvent-type cleaner*, such as rubbing alcohol (isopropyl alcohol). Rinse cleaned area with fresh water then dry with a clean, lint-free cloth.

Crypton Vinyl and Leather cleaner can be used as a non-abrasive cleaner on this product.

*CAUTION: Some solvents are highly flammable. Exercise proper care in cleaning and notify personnel in area of danger. Wear rubber gloves during all cleaning activities. Use caution in cleaning around buttons, stitching and wooden or decorative trim, because these solvents could seriously damage such areas
